

ESPANOLA REGIONAL HOSPITAL AND HEALTH CENTRE

Clinical Informatics Specialist

Permanent Full-Time

The Clinical Informatics Specialist will Provide support to Enterprise Health Information Systems in all aspects of system planning, design, development, implementation, maintenance, evaluation, and education, including those which contribute to the Electronic Medical Record (EMR). Determine clinical functions suitable for computer application and ensure information systems are consistent with professional standards of clinical practice.

QUALIFICATIONS:

The successful candidate should possess the following:

- A Bachelor's Degree or Diploma in a professional Health Care field (e.g. Health Informatics) and/or Computer Science/Software Engineering or related IT/ Health Sciences discipline from an accredited university
- Current Certificate of Registration in good standing with applicable regulatory college
- Minimum of three (3) years' experience working with clinical systems within a health care environment
- Experience working with Meditech software applications required
- Bilingualism (French/English) is an asset

RESPONSIBILITIES:

- Provide guidance on Enterprise Health Applications (e.g. Order Entry (OE), Electronic Medical Record (EMR), and Patient Care Systems (PCS) and other applications as required.
- Determine appropriate system solutions and recommendations, and ensure integration with Decision Support functions.
- Participate in development projects for Health Applications that contribute to or support an EPR.
- Liaise with frontline staff and Information Technology (IT), and represent needs through ongoing consultation and communication.
- Participate in the development of standards of practice for clinicians regarding Health Informatics.
- Participate in policy and procedure development regarding Health Informatics, computer systems, and other technologies.
- Monitor and identify security issues that impact the protection of client information and confidentiality; uphold ethical standards related to data security, confidentiality, and clients' rights to privacy.
- Participate in the development of charting and documentation templates for use in clinical practice.
- Participate in quality and data management initiatives related to patient and health data in practice (e.g. clinical pathways).
- Participate in projects to support ERHHC/NSHN information management initiatives.
- Participate in and facilitate changes to improve the use of Health Informatics within practice.
- Provide training and support to staff on software required to perform their duties within ERHHC/NSHN.
- Participate in education and training specific to current, relevant federal and provincial health and safety legislation, standards and guidelines.
- Represent the department or program on various committees and in meetings as required.
- Perform other duties as required.

This position will provide support both Espanola Regional Hospital and Health Centre and North Shore Health Network.

To apply in confidence, please forward your resume together with a cover letter outlining your relevant experience and qualifications by March 16, 2018 to:
